

Fifth Year- Course Description 2026-2027

1. Course Name:					
Organic Pharmaceutical Chemistry IV					
2. Course Code:					
548 ChPOp4					
3. Semester / Year:					
1 st Semester/5 th Year					
4. Description Preparation Date:					
9-2026					
5. Available Attendance Forms:					
Students' signatures on attendance sheets					
6. Number of Credit Hours (Total) / Number of Units (Total)					
2 hours theory (30) / 2 units					
7. Course administrator's name (mention all, if more than one name)					
Theory:					
Name: Lecturer Dr. Marwan Imad Email: marwan.imad.ijhad@bcms.edu.iq					
8. Course Objectives					
Course Objectives		• Introducing the students to advanced concepts pharmaceutical chemistry such as prodrugs, drug targeting combinatorial chemistry			
9. Teaching and Learning Strategies					
Strategy		• Theory lectures with teaching aids such as videos and diagrams			
10. Course Structure					
Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
1-3	6	• Understanding the concept of prodrugs	• Basic concept of prodrugs; Covalent bonds (cleavable); Prodrugs of functional groups; Types of prodrugs	• Lectures and seminars	• Daily, midterm and final exams, reports and seminars
4-6	6	• Understanding the role of polymers as delivery systems for drugs	• Chemical delivery systems; Polymeric prodrugs; Types and structure of polymers; Cross-linking reagents	• Lectures and seminars	• Daily, midterm and final exams, reports and seminars
7+8	4	• Understanding the concept of targeting drugs to specific tissues and organs	• Drug targeting	• Lectures and seminars	• Daily, midterm and final exams, reports and seminars
8-15	14	• Understanding the concept of combinatorial chemistry and library design	• Combinatorial chemistry; Peptides and other linear structures; Drug like molecules; Support and linker; Solution-	• Lectures and seminars	• Daily, midterm and final exams, reports and seminars

Fifth Year- Course Description 2026-2027

			phase combinatorial chemistry • Detection, purification and analgesics; Encoding combinatorial libraries; High- throughput screening; Virtual screening; Chemical diversity and library design		
11. Course Evaluation					
• 30 M: Theoretical assessment (paper-based midterm exam, attendance) • 70 M: paper-based theoretical final exam					

100 Marks total					
12. Learning and Teaching Resources					
Required textbooks (curricular books, if any)			Wilson and Gisvold Textbook of Orga medicinal and Pharmaceutical chemis Delgado JN, Remers WA, (Eds); 12thediti 2010		
Main references (sources)			Wilson and Gisvold Textbook of Orga medicinal and Pharmaceutical chemis Delgado JN, Remers WA, (Eds); 12thediti 2010		
Recommended books and references (scientific journals, reports...)					
Electronic References, Websites					
Update percentage			1 % change in the theoretical lectures		

Fifth Year- Course Description 2026-2027

1. Course Name:					
Industrial Pharmacy II					
2. Course Code:					
549 Phlp2					
3. Semester / Year:					
First Semester / Fifth Year					
4. Description Preparation Date:					
9-2026					
5. Available Attendance Forms:					
On campus					
6. Number of Credit Hours (Total) / Number of Units (Total):					
2 3 hours/week (Theory) , 2 hours/week (Practical) (75 hours), Total units = 4					
7. Course administrator's name (mention all, if more than one name)					
Theory: Name: Prof. Dr. Alaa Abdul Hussein Email: alaa.abdulhussein@bcms.edu.iq Practical: Name: Lecturer Ahmed Abdulameer Email: ahmed_abdulameer.abed@bcms.edu.iq Name: Lecturer Eman Gameel Email: eman.gameel@bcms.edu.iq					
8. Course Objectives					
Course Objectives	By the end of this course, students will be able to: • Explain the principles of powder and granule formulation, including their roles as dosage forms and methods of granule production. • Describe the manufacturing processes of tablets, including granulation, compression, excipient selection, and common tablet types. • Understand the design and filling of hard and soft capsules, including materials, filling techniques, and formulation considerations. • Differentiate between coating techniques, such as film and sugar coating, and identify equipment, materials, and common coating defects. • Compare batch and continuous manufacturing processes, outlining their advantages, limitations, and applications in tablet production. • Design and evaluate modified-release dosage forms, including extended and delayed release systems, with respect to biopharmaceutical and therapeutic considerations. • Apply principles of product stability, recognizing degradation mechanisms and regulatory stability testing requirements across climatic zones.				
9. Teaching and Learning Strategies					
Strategy	1-Lectures and Presentation 2-Discussions 3- Laboratory experiments 4- Inverted classrooms				
10. Course Structure					
Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
1	3+2	Explain powders and granules as dosage forms and the reasons for granulation	Powders and granules: what is a powder and a granule; reasons for granulation; powdered and granulated products as dosage forms (oral, other routes, external use); preparations	Lectures and practical laboratories	Daily, midterm and final exams, practical exam, reports

Fifth Year- Course Description 2026-2027

			requiring treatment at dispensing; pharmacopoeial tests		
2	3+2	Understand granulation mechanisms and equipment	Pharmaceutical technology of granule production: granulation processes; particle bonding and granule formation mechanisms; wet granulators; extrusion-spheronization; rotorgranulation; melt granulation; dry granulators	Lectures and practical laboratories	Daily, midterm and final exams, practical exam, reports
3	3+2	Describe the manufacture and filling of hard capsules	Hard capsules: raw materials (gelatin and hypromellose, colourants, process aids); manufacture; empty capsule properties; capsule-filling machines; filling with powders, pellets, tablets, semisolids and liquids; formulation and its optimization	Lectures and practical laboratories	Daily, midterm and final exams, practical exam, reports
4	3+2	Describe the manufacture and quality control of soft capsules	Soft capsules: small-scale manufacturing and scale-up; key processing equipment; shell polymer systems (gelatin and non-gelatin); plasticizers; shell modification or coating; fill formulation and types of fill matrices; in-process controls; finished product testing	Lectures and practical laboratories	Daily, midterm and final exams, practical exam, reports

Fifth Year- Course Description 2026-2027

5	3+2	Understand tablet quality attributes and the stages of tablet formation	Tablets: quality attributes of tablets; tablet manufacturing; stages in tablet formation; tablet presses	Lectures and practical laboratories	Daily, midterm and final exams, practical exam, reports
6	3+2	Distinguish tablet production routes and their technical problems	Technical problems during tableting; tablet production via granulation; tablet production by direct compaction	Lectures and practical laboratories	Daily, midterm and final exams, practical exam, reports
7	3+2	Select suitable tablet excipients	Tablet excipients: filler (diluent), disintegrant, binder, glidant, lubricant, antiadherent	Lectures and practical laboratories	Daily, midterm and final exams, practical exam, reports
8	3+2	Differentiate between tablet types	Tablet types: disintegrating, chewable, effervescent, sublingual and buccal, prolonged-release and pulsatile-release tablets	Lectures and practical laboratories	Daily, midterm and final exams, practical exam, reports
9	3+2	Apply quality control tests for tablets	Tablet testing: uniformity of content of active ingredient; disintegration; dissolution; mechanical strength	Lectures and practical laboratories	Daily, midterm and final exams, practical exam, reports
10	3+2	Compare coating techniques and recognize coating defects	Coating of tablets and multiparticulates: process equipment; film-coating formulations and polymers (immediate- and modified-release); plasticizers, colourants and solvents; film-coating defects; sugar coating and its defects	Lectures and practical laboratories	Daily, midterm and final exams, practical exam, reports

Fifth Year- Course Description 2026-2027

11	3+2	Compare batch and continuous manufacturing	Continuous manufacturing of tablets: principles; batch versus continuous processing; advantages and limitations; applications in tablet production	Lectures and practical laboratories	Daily, midterm and final exams, practical exam, reports
12	3+2	Understand the basis of modified-release dosage forms	Modified-release oral drug delivery: meaning for the patient, health care professionals and industry; sites of action and biopharmaceutical considerations	Lectures and practical laboratories	Daily, midterm and final exams, practical exam, reports
13	3+2	Design extended- and delayed-release formulations	Designing a modified-release formulation: factors to consider; extended release; delayed release	Lectures and practical laboratories	Daily, midterm and final exams, practical exam, reports
14	3+2	Recognize the mechanisms of product degradation	Product stability: mechanisms of degradation; chemical, physical and microbiological stability	Lectures and practical laboratories	Daily, midterm and final exams, practical exam, reports
15	3+2	Apply stability testing requirements	Stability testing of pharmaceutical products: types of stability studies; climatic zones; stability test conditions; studies supporting marketing authorization submissions	Lectures and practical laboratories	Daily, midterm and final exams, practical exam, reports
11. Course Evaluation					
Midterm examination 15 marks					
Quiz and classroom activities 5 marks Practical part 20 marks					
Final examination 60 Marks					

Fifth Year- Course Description 2026-2027

12. Learning and Teaching Resources	
Required textbooks (curricular books, if any)	Aulton's Pharmaceutics: The Design and Manufacture of Medicines, 6th edition, 2022.
Main references (sources)	Ansel's Pharmaceutical Dosage Forms and Drug Delivery Systems, 11th edition, 2017.
Recommended books and references (scientific journals, reports...)	Lachman L., Lieberman H., Kanig J. The Theory and Practice of Industrial Pharmacy.
Electronic References, Websites	

Fifth Year- Course Description 2026-2027

1. Course Name:					
Applied Therapeutics I					
2. Course Code:					
550 ACIA1					
3. Semester / Year:					
First semester/ Fifth Year					
4. Description Preparation Date:					
9-2026					
5. Available Attendance Forms:					
On campus					
6. Number of Credit Hours (Total) / Number of Units (Total)					
3 3 Theoretical Hours (45 hours) / 3 Units					
7. Course administrator's name (mention all, if/ more than one name)					
Theory:					
Name: Prof. Dr. Hayder Al-Tukmagi Email: Tukmagi@bcms.edu.iq					
8. Course Objectives					
Course Objectives					
• The course provides students with basic knowledge about pathophysiology, symptoms and aims of treatment. • In addition to the basic knowledge on the drug's use, kinetics, drug interactions, dose calculations, side effects, treatment algorithms and patient awareness are provided.					
9. Teaching and Learning Strategies					
Strategy		Lectures Seminars Simple quizzes Brainstorming questions			
10. Course Structure					
Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
1	2	1. Differentiate between Sensitivity and Specificity of lab tests. 2. Identify reference ranges of lab tests. 3. Identify normal and abnormal liver function tests. 4. Identify normal and abnormal renal function tests. 5. Interpretation of complete blood count test	Interpretation of clinical laboratory data	Lectures and seminars	Daily, midterm and final exams, reports and seminars

Fifth Year- Course Description 2026-2027

		results. 6. Interpretation of urinalysis main findings. 7. Interpretation of hematological lab investigations			
2	2	1. Identify the common types of lipid disorders. 2. Identify the statin-benefit groups and intensity of statin therapy. 3. Recommend appropriate therapeutic lifestyle changes (TLC) and pharmacotherapy interventions for dyslipidemia. 4. Determine a patient's atherosclerotic cardiovascular disease risk and corresponding treatment goals. 5. Identify patients who are	Dyslipidemia.	Lectures and seminars	Daily, midterm and final exams, reports and seminars

Fifth Year- Course Description 2026-2027

		indicated for non-statin therapy. 6. Describe components of a monitoring plan to assess effectiveness and adverse effects of pharmacotherapy for dyslipidemia. 7. Educate patients about the state of the disease, appropriate TLC, and drug therapy required for effective treatment.			
3	1	1. Differentiate types of cerebrovascular disease including transient ischemic attack (TIA), ischemic stroke (cerebral infarction), and hemorrhagic stroke. 2. Identify modifiable and nonmodifiable risk factors associated with	Stroke.	Lectures and seminars	Daily, midterm and final exams, reports and seminars

Fifth Year- Course Description 2026-2027

		ischemic stroke and hemorrhagic stroke. 3. Explain the pathophysiology of ischemic stroke and hemorrhagic stroke. 4. Describe the clinical presentation of TIA, ischemic stroke, and hemorrhagic stroke. 5. Formulate strategies for primary prevention of acute ischemic stroke. 6. Evaluate treatment options for acute ischemic stroke. 7. Determine whether fibrinolytic therapy is indicated in a patient with acute ischemic stroke. 8. Evaluate the role of endovascular therapy in a patient with acute ischemic stroke. 9. Formulate strategies for secondary prevention of acute			
--	--	--	--	--	--

Fifth Year- Course Description 2026-2027

		ischemic strokes. 10. Evaluate treatment options for acute hemorrhagic stroke.			
4	1	1. Assess a patient's kidney function based on clinical presentation, laboratory results, and urinary indices. 2. Identify pharmacotherapeutic outcomes and endpoints of therapy in patients with acute kidney injury (AKI). 3. Apply knowledge of the pathophysiology of AKI to develop a treatment plan. 4. Develop strategies to minimize the occurrence of drug-induced AKI. 5. Monitor and evaluate the safety and effectiveness	Acute kidney injury	Lectures and seminars	Daily, midterm and final exams, reports and seminars

Fifth Year- Course Description 2026-2027

		ss of the treatment plan.			
5	2	1. List the risk factors that increase susceptibility for chronic kidney disease (CKD). 2. Explain the mechanisms associated with the progression of CKD. 3. Outline the desired outcomes for treatment of CKD. 4. Develop a therapeutic approach to slow progression of CKD including lifestyle modifications and pharmacologic therapies. 5. Identify specific consequences associated with CKD. 6. Design an appropriate therapeutic approach for specific consequences associated with CKD.	Chronic and end-stage kidney disease.	Lectures and seminars	Daily, midterm and final exams, reports and seminars
6	1	1. Identify	Hemodialysis and	Lectures and	Daily, midterm

Fifth Year- Course Description 2026-2027

		indications for dialysis. 2. List advantages and disadvantages of hemodialysis and peritoneal dialysis. 3. Describe the principles and procedures of hemodialysis and peritoneal dialysis. 4. Identify complications of hemodialysis and peritoneal dialysis and their management.	peritoneal dialysis.	seminars	and final exams, reports and seminars
7	1	1. Definition of pharmacovigilance. 2. Recognize who should report the pharmacovigilance reports. 3. Describe the importance of pharmacovigilance. 4. Historical events reported ADRs. 5. Describe Causality Assessment. 6. Identify	Pharmacovigilance e.	Lectures and seminars	Daily, midterm and final exams, reports and seminars

Fifth Year- Course Description 2026-2027

		terms used in pharmacovigilance. 7. Identify the importance of pharmacovigilance.			
8	2	1. Explain the pathophysiology of cirrhosis and portal hypertension. 2. Identify signs and symptoms of cirrhosis. 3. Identify laboratory abnormalities that result from liver disease and describe the associated pathophysiology. 4. Describe the consequences associated with decreased hepatic function. 5. Identify treatment goals for a patient with complications of cirrhosis. 6. Recommend a specific treatment regimen for a patient	Cirrhosis and portal hypertension.	Lectures and seminars	Daily, midterm and final exams, reports and seminars

Fifth Year- Course Description 2026-2027

		with cirrhosis that includes lifestyle changes, nonpharmacologic measures, and pharmacologic therapy.			
9	1	1. Differentiate the five types of viral hepatitis by epidemiology, etiology, and clinical presentation. 2. Identify modes of transmission and risk factors among the major types of viral hepatitis. 3. Evaluate hepatic serologies to understand how the type of hepatitis is diagnosed. 4. Create treatment goals for a patient infected with viral hepatitis. 5. Recommend appropriate pharmacot	Viral hepatitis.	Lectures and seminars	Daily, midterm and final exams, reports and seminars

Fifth Year- Course Description 2026-2027

		herapy for prevention of viral hepatitis. 6. Develop a care plan for treatment of chronic viral hepatitis.			
10	1	1. Characterize the pathophysiologic mechanisms underlying inflammatory bowel disease (IBD). 2. Recognize the signs and symptoms of IBD, including major differences between ulcerative colitis (UC) and Crohn disease (CD). 3. Identify appropriate therapeutic outcomes for patients with IBD. 4. Describe pharmacological treatment options for patients with acute or chronic symptoms of UC and CD. 5. Create a	Inflammatory bowel disease.	Lectures and seminars	Daily, midterm and final exams, reports and seminars

Fifth Year- Course Description 2026-2027

		patient-specific drug treatment plan based on symptoms, severity, and location of UC or CD. 6. Recommend appropriate monitoring parameters for drug treatments for IBD			
11	1	1. List the types and etiologies of shock syndromes. 2. Describe the major hemodynamic abnormalities that occur in patients with shock. 3. Describe the clinical presentation including signs, symptoms, and laboratory test measurements for the typical shock patient. 4. Prepare a treatment plan with clearly defined outcome criteria for a shock patient	Shock syndromes.	Lectures and seminars	Daily, midterm and final exams, reports and seminars

Fifth Year- Course Description 2026-2027

		that includes both fluid management and pharmacologic therapy. 5. Compare and contrast the relative advantages and disadvantages of crystalloids, colloids, and blood products in the treatment of shock.			
12	2	1. Estimate the volumes of various body fluid compartments. 2. Identify the electrolytes primarily found in the extracellular and intracellular fluid compartments. 3. Describe the unique relationship between serum sodium concentration and total body water (TBW). 4. Review the etiology, clinical presentation	Disorders of fluids and electrolytes.	Lectures and seminars	Daily, midterm and final exams, reports and seminars

Fifth Year- Course Description 2026-2027

		n, and manageme nt for disorders of sodium, potassium, calcium, phosphoru s, and magnesium .			
13	1	1. Describe the epidemiology and social impact of epilepsy. 2. Define terminology related to epilepsy, including seizure, convulsion, and epilepsy. 3. Describe the basic pathophysiology of seizures and epilepsy. 4. Differentiate and classify seizure types given a description of the clinical presentation of the seizure and electroencephalogram. 5. Identify key therapeutic decision points and therapeutic goals in the treatment	Epilepsy.	Lectures and seminars	Daily, midterm and final exams, reports and seminars

Fifth Year- Course Description 2026-2027

		of epilepsy. 6. Discuss nonpharmacologic treatments for epilepsy. 7. Recommend an appropriate pharmacotherapeutic regimen with monitoring parameters for the treatment of epilepsy. 8. Devise a plan for switching a patient from one antiepileptic regimen to a different regimen. 9. Manage potential drug interactions with antiepileptic drugs (AEDs). 10. Determine when and how to discontinue AED therapy.			
14	1	1. Identify risk factors for multiple sclerosis (MS). 2. Distinguish between forms of MS based on patient presentation	Multiple sclerosis.	Lectures and seminars	Daily, midterm and final exams, reports and seminars

Fifth Year- Course Description 2026-2027

		n and disease course. 3. Compare and contrast MS disease-modifying treatment choices for a given patient. 4. Determine appropriate symptomatic treatment choices for a given patient. 5. Develop a monitoring plan for a patient placed on specific medications.			
15	1	1. Evaluate patient-specific parameters to determine whether EN is appropriate. 2. Compare clinical efficacy, complications, and costs of EN versus parenteral nutrition (PN). 3. Describe the components of EN and their role in nutrition support therapy. 4. Develop a	Enteral nutrition.	Lectures and seminars	Daily, midterm and final exams, reports and seminars

Fifth Year- Course Description 2026-2027

		plan to design, initiate, and adjust an EN formulation for an adult patient based on patient-specific factors. 5. Describe the etiology and risk factors for EN-associated complications in adult patients receiving EN. 6. Select appropriate medication administration techniques for an EN patient.			
16	1	1. List appropriate indications for parenteral nutrition (PN) in adult patients. 2. Describe the components of PN and their role in nutrition support therapy. 3. Develop a plan to design, initiate,	Parenteral nutrition.	Lectures and seminars	Daily, midterm and final exams, reports and seminars

Fifth Year- Course Description 2026-2027

		and adjust a PN formulation for an adult patient based on patient-specific factors. 4. Describe the etiology and risk factors for PN macronutrient-associated complications in adult patients receiving PN. 5. Describe the etiology and risk factors for refeeding syndrome, as well as measure to prevent refeeding syndrome.			
17	1	1. Identify risk factors and signs and symptoms of deep vein thrombosis (DVT) and pulmonary embolism (PE). 2. Describe the processes of hemostasis and thrombosis	Deep venous thrombosis.	Lectures and seminars	Daily, midterm and final exams, reports and seminars

Fifth Year- Course Description 2026-2027

		3. Determine a patient's relative risk of developing venous thrombosis 4. Formulate an appropriate prevention strategy for a patient at risk for DVT. 5. Select and interpret laboratory test(s) to monitor antithrombotic drugs. 6. Identify factors that place a patient at high risk of bleeding while receiving antithrombotic drugs. 7. State at least two potential advantages of newer anticoagulants (ie, low molecular weight heparins [LMWHs], fondaparinux, oral direct thrombin inhibitors [DTIs], and oral direct factor Xa inhibitors)			
--	--	---	--	--	--

Fifth Year- Course Description 2026-2027

		over traditional anticoagulants (ie, unfractionated heparin and warfarin). 8. Manage a patient with toxicity secondary to warfarin (elevated international normalized ratio [INR] with or without bleeding). 9. Identify anticoagulant drug-drug and drug-food interactions. 10. Formulate an appropriate treatment plan for a patient who develops a DVT or PE.			
18	2	1. Describe the phases of cardiac action potential. 2. Describe the modified Vaughan Williams classification of antiarrhythmic drugs. 3. Compare and	Arrhythmias.	Lectures and seminars	Daily, midterm and final exams, reports and seminars

Fifth Year- Course Description 2026-2027

		contrast risk factors for and features, mechanism s, etiologies, symptoms, and goals of therapy of (a) sinus bradycardia , (b) atrioventric ular (AV) block, (c) atrial fibrillation (AF), (d) paroxysmal supraventri cular tachycardia (PSVT), (e) premature ventricular complexes (PVCs), (f) ventricular tachycardia (VT, including torsades de pointes [TdP]), and (g) ventricular fibrillation (VF). 4. Compare and contrast appropriat e treatment options for sinus bradycardi a and AV block. 5. Compare and contrast mechanism			
--	--	---	--	--	--

Fifth Year- Course Description 2026-2027

		s of action of drugs used for ventricular rate control, conversion to sinus rhythm and maintenanc e of sinus rhythm in patients with AF. 6. Compare and contrast the advantages and disadvanta ges of warfarin and the non- vitamin K antagonist oral anticoagula nts (NOACs) for prevention of stroke and systemic embolism in patients with AF. 7. Discuss nonpharma cologic methods for terminatio n of PSVT, compare mechanism s of action o f drugs used for acute terminatio			
--	--	--	--	--	--

Fifth Year- Course Description 2026-2027

		n of PSVT and compare appropriate treatment options for long-term prevention of PSVT recurrence. 8. Compare and contrast mechanisms of action of drugs used for treatment of acute episodes of VT and describe options and indications for nonpharmacologic treatment of VT and VF. 9. Design individualized drug therapy treatment plans for patients with (a) sinus bradycardia, (b) AV block, (c) AF, (d) PSVT, (e) PVCs, (F)VT (including TdP), and (g) VF.			
19	2	1. Identify characteristics of the types of pain:	Pain management.	Lectures and seminars	Daily, midterm and final exams, reports and seminars

Fifth Year- Course Description 2026-2027

		nociceptive , inflammato ry, neuropathi c, and functional. 2. Explain the mechanism s involved in pain transmissio n. 3. Select an appropriat e method of pain assessment . 4. Recommen d an appropriat e choice of analgesic, dose, and monitoring plan for a patient based on type and severity of pain and other patient- specific parameters . 5. Perform calculations involving equianalge sic doses, conversion of one opioid to another, rescue doses, and conversion to a continuous infusion. 6. Educate patients and caregivers			
--	--	---	--	--	--

Fifth Year- Course Description 2026-2027

		about effective pain management, dealing with chronic pain, and the use nonpharmacologic measures.			
20	1	1. Differentiate the types of headache syndromes based on clinical features. 2. Recommend nonpharmacologic measures for headache treatment and prevention. 3. Determine when the pharmacologic treatment of headache is indicated. 4. Construct individualized treatment regimens for the acute and chronic management of headache syndromes. 5. Monitor headache treatment to ensure its	Headache.	Lectures and seminars	Daily, midterm and final exams, reports and seminars

Fifth Year- Course Description 2026-2027

		safety, tolerability, and efficacy.			
21	2	1. Describe the pathophysiology of Parkinson disease (PD) related to neurotransmitter involvement and targets for drug therapy. 2. Recognize the cardinal motor symptoms of PD and determine a patient's clinical status and disease progression . 3. For a patient initiating therapy for PD, recommend appropriate drug therapy and construct patient-specific treatment goals. 4. Recognize and recommend appropriate treatment for	Parkinson's disease.	Lectures and seminars	Daily, midterm and final exams, reports and seminars

Fifth Year- Course Description 2026-2027

		nonmotor symptoms. 5. Formulate a plan to minimize patient “off-time” and maximize “on-time” including timing, dosage, and frequency of medications. 6. Recognize and treat various motor complications in PD. 7. Construct appropriate patient counseling regarding medications and lifestyle modifications for PD. 8. Develop a monitoring plan to assess effectiveness and adverse effects of treatment.			
22	1	1. Explain the pathophysiology of benign prostatic hypertrophy (BPH). 2. Recognize the symptoms and signs of BPH. 3. List the	Benign prostatic hyperplasia.	Lectures and seminars	Daily, midterm and final exams, reports and seminars

Fifth Year- Course Description 2026-2027

		desired treatment outcomes for BPH. 4. Identify factors that guide selection of a particular α1-adrenergic antagonist for an individual patient. 5. Compare and contrast α1-adrenergic antagonists versus 5α-reductase inhibitors in terms of mechanism of action, treatment outcomes, adverse effects, and interactions . 6. Describe the indications, advantages , and disadvantages of various combination drug regimens that include an α1-adrenergic antagonist, 5α-reductase inhibitor, anticholinergic agent, tadalafil, or mirabegron			
--	--	---	--	--	--

Fifth Year- Course Description 2026-2027

		- Describe the indications for surgical intervention. - Apply the patient care process to develop an individualized treatment plan.			
23	1	- Identify risk factors for the development of primary open-angle glaucoma (POAG) and acute angle-closure glaucoma. - Recommend a frequency for glaucoma screening based on patient-specific risk factors. - Compare and contrast the pathophysiologic mechanisms responsible for open-angle glaucoma and acute angle-closure	Glaucoma.	Lectures and seminars	Daily, midterm and final exams, reports and seminars

Fifth Year- Course Description 2026-2027

		glaucoma. 4. Outline the clinical presentation of chronic open-angle glaucoma and acute angle-closure glaucoma. 5. List the goals of managing patients with POAG suspect, POAG, and acute angle-closure glaucoma. 6. Choose the most appropriate therapy based on patient-specific data for open-angle glaucoma, glaucoma suspect, and acute angle-closure glaucoma. 7. Develop a monitoring plan for patients on specific pharmacologic regimens. 8. Counsel patients about glaucoma, drug therapy options,			
--	--	--	--	--	--

Fifth Year- Course Description 2026-2027

		ophthalmic administration techniques, and the importance of adherence to the prescribed regimen.			
11. Course Evaluation					
Midterm exam 25 marks, Quizzes and attendance 5 marks, Final exam 70 marks					
12. Learning and Teaching Resources					
Required textbooks (curricular books, if any)		Clinical pharmacy and therapeutics. Pharmacotherapy handbook. ACCP updates in therapeutics. Pharmacotherapy: A pathophysiologic approach. Pharmacotherapy: principles and practice. Applied therapeutics.			
Main references (sources)		Pharmacotherapy: Pathophysiologic approach. Pharmacotherapy: principles and practice. Applied therapeutics. ACCP updates in therapeutics.			
Recommended books and references (scientific journals, reports...)		Pharmacotherapy: A pathophysiologic approach. Pharmacotherapy: principles and practice			
Electronic References, Websites		Electronic books and review articles.			

Fifth Year- Course Description 2026-2027

1. Course Name:					
Clinical Chemistry					
2. Course Code:					
551 ACLCc					
3. Semester / Year:					
First semester / Fifth					
4. Description Preparation Date:					
9-2026					
5. Available Attendance Forms:					
In-person attendance					
6. Number of Credit Hours (Total) / Number of Units (Total)					
3 hours theory+ 2 hours practical (75)/ 4 units					
7. Course administrator's name (mention all, if more than one name)					
Theory: Name: Assist. Prof. Dr. Zainab Al-Shamaa Email: z.alshamma@bcms.edu.iq Practical: Name: Assistant Lecturer Yousef Alwan Email: yousefalwan@bcms.edu.iq					
8. Course Objectives					
Course Objectives		1) Understanding of human body chemistry in both healthy and diseased states, enabling to diagnose, monitor, and manage disease through laboratory data analysis. 2) Interpreting the results of biochemistry analyses that augment the clinical examination to achieve definite diagnosis of the disease. 3) Evaluating data accuracy and applying this knowledge to therapeutic decision-making and patient care.			
9. Teaching and Learning Strategies					
Strategy		• Presentation and recitation • Reading & research • Interactive discussions • Brainstorming			
10. Course Structure					
Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
1	4	Disorders of Carbohydrates metabolism, Hyperglycemia & Diabetes mellitus, Hypoglycemia	Carbohydrates disorders	Lectures and practical laboratories	Daily, midterm and final exams, practical exam, reports
2	3	Understanding the abnormalities in the metabolism of lipids and the laboratory assessment	Disorders of lipid metabolism	Lectures and practical laboratories	Daily, midterm and final exams, practical exam, reports

Fifth Year- Course Description 2026-2027

3	3	Understanding of the metabolic, synthetic and excretory functions of the liver and the related disorders; and the laboratory assessment of liver functions	Liver function tests	Lectures and practical laboratories	Daily, midterm and final exams, practical exam, reports
4	3	Understanding of the excretory functions of the kidney and its role in maintaining blood hemostasis and elimination of waste products Study of the acute and chronic kidney diseases and the laboratory tests of kidney functions; and types of kidney stones	Kidney function tests	Lectures and practical laboratories	Daily, midterm and final exams, practical exam, reports
5	3	Study of different diseases associated with change in Enzymatic Activity in blood	Diagnostic enzymology	Lectures and practical laboratories	Daily, midterm and final exams, practical exam, reports
6-7	6	Understand of hormone types, functions and regulation, with special emphasis on the hypothalamic hormones The pituitary gland hormones actions and disorders; and the laboratory analyses of pituitary gland disorders The adrenal gland hormones actions and disorders; and the laboratory analyses of adrenal	Hypothalamus & pituitary endocrinology, adrenal gland	Lectures and practical laboratories	Daily, midterm and final exams, practical exam, reports

Fifth Year- Course Description 2026-2027

		gland disorders			
8-9	6	The male and female reproductive glands hormones and the physiologic and pathologic alterations in their levels	Reproductive glands hormones and diseases	Lectures and practical laboratories	Daily, midterm and final exams, practical exam, reports
10	3	The thyroid gland hormones actions and disorders; and the laboratory analysis of thyroid gland disorders	Thyroid gland hormones and diseases	Lectures and practical laboratories	Daily, midterm and final exams, practical exam, reports
11	3	Drug interaction with laboratory Tests	Drug interaction with laboratory Tests	Lectures and practical laboratories	Daily, midterm and final exams, practical exam, reports
12	3	Disorders of calcium metabolism	Disorders of calcium metabolism	Lectures and practical laboratories	Daily, midterm and final exams, practical exam, reports
13	2	Study of different tumor markers in blood that can be used for detection and monitoring tumors	Tumor markers	Lectures and practical laboratories	Daily, midterm and final exams, practical exam, reports
14-15	6	Inborn errors of metabolism	Inborn errors of metabolism	Lectures and practical laboratories	Daily, midterm and final exams, practical exam, reports

11. Course Evaluation

Midterm examination 15 marks
 Quiz and classroom activities 5 marks Practical part 20 marks
 Final examination 60 Marks

12. Learning and Teaching Resources

Required textbooks (curricular books, if any)	1) Crook, Clinical Chemistry & Metabolic Medicine, 8th edition 2) Tietz Clinical Chemistry& Molecular Diagnostics 6th edition; 2018 3) Kaplan, Clinical Chemistry, 5th edition
Main references (sources)	Tietz Clinical chemistry& Molecular Diagnostics 7th edition; .2015
Recommended books and references (scientific journals, reports...)	Clinical Chemistry, Kaplan 2012
Electronic References, Websites	

Fifth Year- Course Description 2026-2027

1. Course Name:					
Hospital training					
2. Course Code:					
552 ACIht					
3. Semester / Year:					
First Semester / Fifth Year					
4. Description Preparation Date:					
9-2026					
5. Available Attendance Forms:					
Training in hospital					
6. Number of Credit Hours (Total) / Number of Units (Total)					
Four hours practical (60) / 2 Units					
7. Course administrator's name (mention all, if more than one name)					
Practical: Name: Dr. Kawther Faris Email: kawther.kf@gmail.com Name: Lecturer Dr. Haider Mohammed Badee Email: haider.mohammed.badee@bcms.edu.iq Name: Assistant Lecturer Ameer Ali Kazal Email: ameerali@bcms.edu.iq					
8. Course Objectives					
Course Objectives		To teach students the application of pharmacy practice in differ hospital wards; it includes • Training in case evaluation and follow up • Evaluation of therapeutic regimens and registration of err related to drug therapy and presenting ideas to solve problems			
9. Teaching and Learning Strategies					
Strategy		Explaining cases of patients in different hospital wards Discussions with board students in hospital Brainstorming questions			
10. Course Structure					
Wee k	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
1-4	4	To provide the students the essential clinical pharmacy skills with emphasis on dealing with patients, medical charts laboratory information, and clinical monitoring. The following topics will be covered: (Cardiology, Nephrology, Gastroenterology, Pulmonology, and Endocrinology)	Internal medicine	Lectures and practical laboratories	Daily, midterm and final exams, practical exam, reports
5-8	4	To provide the students the essential clinical pharmacy skills with emphasis on	pediatrics	Lectures and practical laboratories	Daily, midterm and final exams, practical exam, reports

Fifth Year- Course Description 2026-2027

		dealing with patients, medical charts, laboratory information, and clinical monitoring. The following topics will be covered: Pediatric Neonatology, Pediatric Nephrology, Pediatric Infections, Pediatric Neurology, Pediatric Cardiology, Pediatric Gastroenterology, Pediatric Respiratory Disorders, and pediatric endocrinology			
9-12	4	To provide the students the essential clinical pharmacy skills with emphasis on dealing with patients, medical charts, laboratory information, and clinical monitoring. The following topics will be covered: Surgical Prophylaxis, Types of Surgical Operations, Preoperative bowel preparation, Intravenous fluid therapy, Blood transfusion and blood products, Peri-operative care and diabetes, Perioperative medication management,	surgery	Lectures and practical laboratories	Daily, midterm and final exams, practical exam, reports

Fifth Year- Course Description 2026-2027

		Acute appendicitis, Gallstones, Common bile duct stones, Thyroidectomy, Bowel Obstruction, Pancreatitis, Hernia, Guidelines on Parenteral Nutrition in Surgery.			
13-16	4	To provide the students the essential clinical pharmacy skills with emphasis on dealing with patients, medical charts, laboratory information, and clinical monitoring. The following topic will be covered: Abortion, Common Complications of Pregnancy, Induction and Augmentation of labor, Obstetric hemorrhage, Caesarean section, Ectopic Pregnancy, Heavy and irregular Menstruation, Polycystic Ovarian Syndrome, Molar Pregnancy, some drugs that are used in obstetrics and gynecology	Obstetrics gynecology	Lectures and practical laboratories	Daily, midterm and final exams, practical exam, reports
11. Course Evaluation					
34 quizzes, 6 case presentation, 60 final exams.					
12. Learning and Teaching Resources					
Required textbooks (curricular books, if any)			Manuals for Clinical Training Adopted by the		
Main references (sources)			Manuals for Clinical Training Adopted by Department		
Recommended books and references (scientific journals, reports...)			Pharmacy times (journal) Us pharmacist (journal)		
Electronic References, Websites			UpToDate resource, Medscape		

Fifth Year- Course Description 2026-2027

1. Course Name					
Clinical Toxicology					
2. Course Code					
553 ACICt					
3. Semester / Year					
1 st semester / Fifth year					
4. Description Preparation Date:					
9-2026					
5. Available Attendance Forms					
on campus					
6. Number of Credit Hours (Total) / Number of Units (Total)					
2 hours theoretical + 2 hours practical (60) / 3 units					
7. Course administrator's name (if more than one name)					
Theory: Name: Lecturer Dr. Humam Tawfiq Hadi Email: humam.hadi@bcms.edu.iq Practical: Name: Assistant Lecturer Muhee Nimma Email: muhee.nimma.salman@bcms.edu.iq					
8. Course Objectives					
Course Objectives		Clinical toxicology aims to study the harmful effects of agents and drugs on humans, Study how to diagnose, treat and prevent the harmful effects of toxic substances.			
9. Teaching and Learning Strategies					
strategy		Lecturing Homework Quiz			
10. Course Structure					
The week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
1	3	Students will be able to study how to assess the general physical health of a person, give clues to possible diseases, and show progress toward recovery.	Vital signs	Lectures and practical laboratories	Daily, midterm and final exams, practical exam, reports
2	2	Students will be able to study how to analyses the symptomology, clinical interventions and outcomes of patients presenting with severe metformin toxicity.	Metformin toxicity		

Fifth Year- Course Description 2026-2027

3	2	Students will be able to study the <i>etiology</i> of hydrocarbon toxicity .and the typical presentation of a patient with hydrocarbon toxicity.	Hydrocarbon Toxicity		
4	2	Students will be able to study the signs and symptoms of toxicity and treatment of toxicity.	ACEI poisoning		
5	2	Students will be able to study the objective of poison centers and how to reduce morbidity and mortality associated with poisonings.	Poison centers		
6	2	Students will be able to study the caustics and corrosives and how cause tissue injury by a chemical reaction.	Caustics and corrosives		
7	2	Students will be able to study the sign and symptom of toxicity and antidote of toxicity.	Opioid toxicity		
8		Students will be able to study the potential toxicity of NSAIDs	NSAID toxicity		
9	2	Students will be able to study the sign and symptoms of toxicity and treatment of toxicity.	Adrenergic toxicity		

Fifth Year- Course Description 2026-2027

10	2	Students will be able to study the toxicokinetic of cocaine toxicity, physical exam findings for a patient with cocaine toxicity and the management options for cocaine toxicity. the management options for cocaine toxicity	Cocaine toxicity		
11	2	Students will be able to study the most common drugs and chemicals associated with ventricular dysrhythmias and their outcomes.	Dysrhythmia toxicity		
12	3	Students will be able to study the etiology of digoxin toxicity, the pathophysiology of digoxin toxicity. And the management of digoxin toxicity.	Digoxin toxicity		
11. Course Evaluation					
15 marks: Theoretical Midterm Exam:					
20 marks: Practical					
5 marks: Daily Exams					
60 Marks: final exam					
12. Learning and Teaching Resources					
Required textbooks (curricular books, if any)			Goldfrank's Toxicologic Emergencies, Ninth Edition		
Main references (sources)			Toxicology Recall Toxicology Recall 1st Edition		
Recommended books and references (scientific journals, reports...)					
Web sites					

Fifth Year- Course Description 2026-2027

1. Course Name:					
Graduation Project					
2. Course Code:					
554 GP					
3. Semester / Year:					
First Semester / Fifth Year					
4. Description Preparation Date:					
9-2026					
5. Available Attendance Forms:					
On campus — supervised project work					
6. Number of Credit Hours (Total) / Number of Units (Total)					
One hour/week (15 hours) / One unit					
7. Course administrator's name (mention all, if more than one name)					
Name: Email:					
8. Course Objectives					
Course Objectives		Apply the scientific research method to a pharmaceutical problem of the student's choosing. Search, appraise and document the scientific literature relevant to the chosen topic. Write a structured research proposal and discuss it with the supervising committee. Collect, analyse and present data using appropriate statistical tools. Write a scientific report in the recognised academic format with correct citation. Present and defend the work orally before an examining committee. Practise research ethics, scientific honesty and respect for intellectual property.			
9. Teaching and Learning Strategies					
Strategy		Individual and small-group supervision meetings Guided self-learning and directed reading Workshops on literature searching, reference managers and scientific writing Progress seminars and peer feedback Continuous formative assessment by the supervisor			
10. Course Structure					
Wee k	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
1	1	Recognise the aims, regulations and timeline of the graduation project	Introduction to the graduation project; regulations and assignment of supervisors	Lectures and seminars	Daily, midterm and final exams, reports and seminars
2-3	2	Select a feasible topic and formulate a clear research question	Topic selection and formulation of the research question	Lectures and seminars	Daily, midterm and final exams, reports and seminars
4-5	2	Search databases, appraise sources and document them correctly	Literature searching and scientific documentation	Lectures and seminars	Daily, midterm and final exams, reports and seminars

Fifth Year- Course Description 2026-2027

6	1	Write a structured research proposal	Writing and discussing the research proposal	Lectures and seminars	Daily, midterm and final exams, reports and seminars
7-8	2	Choose an appropriate methodology and apply research ethics	Research methodology and research ethics	Lectures and seminars	Daily, midterm and final exams, reports and seminars
9-10	2	Collect data or carry out the practical part safely and accurately	Data collection or execution of the practical part	Lectures and seminars	Daily, midterm and final exams, reports and seminars
11	1	Analyse data and present results in tables and figures	Statistical analysis and presentation of results	Lectures and seminars	Daily, midterm and final exams, reports and seminars
12-13	2	Write the final report in the recognised academic format	Writing the final report and citation	Lectures and seminars	Daily, midterm and final exams, reports and seminars
14	1	Prepare a clear and well-organised presentation	Preparation of the oral presentation	Lectures and seminars	Daily, midterm and final exams, reports and seminars
15	1	Present and defend the work before the examining committee	Final defence before the committee	Lectures and seminars	Daily, midterm and final exams, reports and seminars

11. Course Evaluation

35 Research proposal 10 marks · Follow-up and commitment during the project 20 marks · Final written report 40 marks · Oral defence before the committee 30 marks · Total 100 marks

12. Learning and Teaching Resources

Required textbooks (curricular books, if any)	Guidelines for the Graduation Project adopted by the Department of Pharmacy
Main references (sources)	Research methodology references adopted by the college; Designing and Conducting Research in Health and Human Sciences
Recommended books and references (scientific journals, reports...)	Scientific journals in the field of the chosen topic; How to Write and Publish a Scientific Paper — Day and Gastel
Electronic References, Websites	PubMed · Google Scholar · ScienceDirect · Mendeley and Zotero (reference managers)

Fifth Year- Course Description 2026-2027

1. Course Name:					
Pharmacoeconomics					
2. Course Code:					
555 ACIPco					
3. Semester / Year:					
2 nd semester/ 5 th year students					
4. Description Preparation Date:					
9-2026					
5. Available Attendance Forms:					
Class attendance (on-campus)					
6. Number of Credit Hours (Total) / Number of Units (Total)					
Two hours theory (30) /2 Units					
7. Course administrator's name (mention all, if more than one name)					
Name: Lecturer Dr. Humam Tawfiq Hadi					
Email: humam.hadi@bcms.edu.iq					
Name: Lecturer Dr. Nawfel Ayad					
Email: nawfel.ayad@bcms.edu.iq					
8. Course Objectives					
Course Objectives		Understand the basic terms of Pharmacoeconomics, how to build the model for economic feasibility studies, and how to extract statistical data from clinical studies to include them in the model for the economic feasibility study.			
9. Teaching and Learning Strategies					
Strategy		Lecturing Quiz			
10. Course Structure					
Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
1	4	1. Introducing Pharmacoeconomic principles. 2. Demonstrate types of healthcare costs with examples 3. Learn about ECHO models for the 3 patient outcome types. 4. Explain and differentiate among the 4 methods of Pharmacoeconomics	Basic principle of Pharmacoeconomics	Lectures and seminars	Daily, midterm and final exams, reports and seminars

Fifth Year- Course Description 2026-2027

		conomic analyses.			
2	4	1. Identifying costs 2. Types of costs (Direct Medical Costs, Direct Nonmedical Costs, Indirect costs, Intangible costs) 3. Incremental costs and marginal costs 4. Opportunity costs 5. How are costs valued? Time Adjustments for Costs	Cost analysis	Lectures and seminars	Daily, midterm and final exams, reports and seminars
3	4	1. Understand the Cost-effectiveness analysis 2. Outcome measures in cost-effectiveness analysis 3. Knowing how to calculate Cost-effectiveness Ratios	Cost-minimizing analysis and Cost effectiveness analyses (CEA).	Lectures and seminars	Daily, midterm and final exams, reports and seminars
4	4	1. Understand the Cost-Benefit Analysis method. 2. Knowing how to calculate the indirect cost of the disease	Cost-benefit analysis (CBA)	Lectures and seminars	Daily, midterm and final exams, reports and seminars

Fifth Year- Course Description 2026-2027

		and indirect benefit of the intervention/program 3. Using Human Capital Method (HCM). 4. Using HCM to calculate Daily wage rate and Missed days to find out the indirect benefit of the intervention/management. 5. Describe in detail the Willingness-to-Pay Method (WTP): Hypothetical Scenario & Bidding Vehicles 6. Formats for presenting Cost-Benefit Analysis (CBA) When we should select 7. Cost-Benefit or Cost-Effectiveness Analysis?			
--	--	--	--	--	--

Fifth Year- Course Description 2026-2027

5	4	1. Use of decision analysis to design economic evaluations 2. Decision Analysis Structure or tree	Critical assessment of economic evaluation	Lectures and seminars	Daily, midterm and final exams, reports and seminars
6	4	1. Define Cost of illness 2. Knowing how to calculate Cost of illness 3. Understand the difference between healthcare costs and the cost of illness	Drug-focused versus disease-focused framework for conducting Pharmacoeconomic analyses.	Lectures and seminars	Daily, midterm and final exams, reports and seminars
7	4	the students should be able to: 1. define epidemiology, describe basic terminology and concepts of epidemiology. 2. identify types of data sources. 3. Identify basic methods of data collection and interpretation.	Introduction to epidemiology.	Lectures and seminars	Daily, midterm and final exams, reports and seminars

Fifth Year- Course Description 2026-2027

8	2	Cost-Effectiveness project can be assigned to teach students how to understand the terminologies used in published Pharmacoeconomic studies.	Project presentation.	Lectures and seminars	Daily, midterm and final exams, reports and seminars
11. Course Evaluation					
4 points for quizzes, 5 points for assignments, 20 points for midterm exam and 70 points for the final exam					
12. Learning and Teaching Resources					
Required textbooks (curricular books, if any)		Bootman JL, Townsend RJ, McGhan WF, (Eds.), Principles Pharmacoeconomics, 2 nd ed., Harvey Whitney Books Compa Cincinnati, Oh, latest edition Renée J.G. Arnold. Pharmacoeconomics From Theory to Practice. Second Edition, 2021. CRC Press, Boca Raton, FL, USA			
Main references (sources)

Fifth Year- Course Description 2026-2027

1. Course Name:					
Applied Therapeutics II					
2. Course Code:					
556 ACIAt2					
3. Semester / Year:					
Second semester/ Fifth Year					
4. Description Preparation Date:					
9-2026					
5. Available Attendance Forms:					
On campus					
6. Number of Credit Hours (Total) / Number of Units (Total)					
2 Hours theory (30) /2 Units					
7. Course administrator's name (mention all, if more than one name)					
Theory:					
Name: Prof. Dr. Hayder Al-Tukmagi Email: Tukmagi@bcms.edu.iq					
8. Course Objectives					
Course Objectives		• It provides students with basic knowledge about pathophysiology, symptoms and aims of treatment for some cancers, endocrine, gynecological, psychiatric, and neurological disorders • It provides students with basic knowledge about medications use, dose considerations, side effects, treatment algorithms and evaluation of therapeutic outcomes for the disorders			
9. Teaching and Learning Strategies					
Strategy		Lectures Seminars Simple quizzes Brainstorming questions			
10. Course Structure					
Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
1	1	1. Explain the regulation and physiologic al roles of hormones produced by the adrenal glands. 2. Recognize the clinical presentatio n of adrenal insufficienc y. 3. Describe the pharmacol ogic manageme nt of acute and chronic	Adrenal gland disorders	Lectures and seminars	Daily, midterm and final exams, reports and seminars

Fifth Year- Course Description 2026-2027

		adrenal insufficiency. 4. Recommend therapy monitoring parameters for adrenal insufficiency. 5. Recognize the clinical presentation of Cushing syndrome and the physiological consequences of cortisol excess. 6. Describe the pharmacologic and nonpharmacologic management of Cushing syndrome. 7. Recommend strategies to prevent the development of hypercortisolism and hypercortisolism. 8. Recommend therapy monitoring parameters for Cushing syndrome.			
2	2	1. Explain the major components of the hypothalamic-pituitary- thyroid axis and	Thyroid gland disorders	Lectures and seminars	Daily, midterm and final exams, reports and seminars

Fifth Year- Course Description 2026-2027

	interaction among these components. 2. Discuss the relationship between serum thyroid-stimulating hormone (TSH) levels and primary thyroid disease, and advantages for the use of TSH levels over other tests such as serum T4 (thyroxine) and T3 (triiodothyronine) levels. 3. Identify typical signs and symptoms of hypothyroidism and consequences of suboptimal treatment. 4. Describe clinical use of levothyroxine (LT4) in the treatment of hypothyroidism. 5. Discuss issues regarding LT4 product bioequivalence and reasons for maintaining patients on the same product. 6. Describe the management of hypothyroidism and hyperthyroidism in special populations, including pregnant women. 7. Identify typical signs and symptoms of hyperthyroidism and consequences of inadequate treatment.			
--	--	--	--	--

Fifth Year- Course Description 2026-2027

		8. Discuss the pharmacotherapy of hyperthyroidism, including advantages and disadvantages of antithyroid drugs versus radioactive iodine, adverse effects, and patient monitoring.			
3	1	1. Describe the pathophysiology, including genetic and environmental factors that may be associated with AD. 2. Detail the clinical presentation of the typical patient with AD. 3. Explain how nonpharmacologic therapy is combined with pharmacologic therapy for patients with AD. 4. Recognize and recommend treatment options for disease-specific symptoms as well as behavioral/	Alzheimer disease	Lectures and seminars	Daily, midterm and final exams, reports and seminars

Fifth Year- Course Description 2026-2027

		noncognitive symptoms associated with AD. 5. Educate patients and/or caregivers about the expected outcomes for patients with AD and provide contact information for support/advocacy agencies.			
4	2	1. Recognize signs and symptoms of schizophrenia 2. Explain potential pathophysiologic mechanisms that are thought to underlie schizophrenia. 3. Identify treatment goals for a patient with schizophrenia. 4. Recommend appropriate antipsychotic medications based on patient-specific	Schizophrenia	Lectures and seminars	Daily, midterm and final exams, reports and seminars

Fifth Year- Course Description 2026-2027

		data. - Compare side effect profiles of individual antipsychotics. - Educate patients and families about schizophrenia, treatments, and the importance of adherence to antipsychotic treatment.			
5	2	- Explain the etiology and pathophysiology of major depressive disorder (MDD). - Identify the signs and symptoms of MDD. - Outline the treatment goals for a patient with MDD. - Recommend pharmacotherapy given a specific patient with MDD. - Develop a monitoring plan for a specific patient	Depressive disorders	Lectures and seminars	Daily, midterm and final exams, reports and seminars

Fifth Year- Course Description 2026-2027

		with MDD that includes the assessment of efficacy as well as adverse effects. 6. Educate patients and caregivers on the proper use of antidepressant therapy.			
6	1	1. Explain the pathophysiologic mechanisms underlying anxiety disorders. 2. Recognize common presenting symptoms of generalized anxiety disorder (GAD) 3. List treatment goals for patients with GAD. 4. Identify appropriate lifestyle modifications and over-the-counter medication use in these patients. 5. Design a patient-specific pharmacot	Anxiety	Lectures and seminars	Daily, midterm and final exams, reports and seminars

Fifth Year- Course Description 2026-2027

		herapy treatment plan for patients. 6. Develop a monitoring plan for patients with anxiety disorders.			
7	1	1. Describe the pathophysiology and characteristic features of insomnia. 2. Recommend and optimize appropriate sleep hygiene and nonpharmacologic therapies for the management and prevention of sleep disorders. 3. Recommend and optimize appropriate pharmacotherapy for insomnia. 4. Describe the components of the patient care process to implement and assess safety and efficacy of pharmacotherapy for insomnia.	Sleep disorders (insomnia)	Lectures and seminars	Daily, midterm and final exams, reports and seminars
8	1	1. Discuss the	Contraception	Lectures and seminars	Daily, midterm and final exams,

Fifth Year- Course Description 2026-2027

		physiology of the female reproductive system. 2. Compare the efficacy of oral contraceptives with that of other methods of contraception. 3. State the mechanism of action of hormonal contraceptives. 4. Discuss adverse effects, risks, and contraindications associated with the use of contraceptives and recommended strategies for minimizing or eliminating such risks. 5. Describe advantages and disadvantages of various contraceptives, including oral and nonoral formulations. 6. Cite important			reports and seminars
--	--	---	--	--	-----------------------------

Fifth Year- Course Description 2026-2027

		drug interaction s that may occur with oral contraceptives. 7. Provide appropriate patient education regarding the use of oral and barrier methods of contraception. 8. Discuss how emergency contraception may be employed to prevent unintended pregnancy.			
9	2	1. Explain the physiological changes associated with menopause . 2. Identify the signs and symptoms associated with menopause . 3. Determine the desired therapeutic outcomes for patients taking menopausal hormone replacement therapy (MHRT). 4. Explain how to evaluate a patient for	Hormone replacement therapy in post-menopausal women	Lectures and seminars	Daily, midterm and final exams, reports and seminars

Fifth Year- Course Description 2026-2027

		the appropriate use of MHRT. 5. Recommend appropriate nonpharmacologic and pharmacologic interventions for menopausal symptoms. 6. Design a monitoring plan to assess the safety and effectiveness of pharmacotherapy			
10	1	1. Describe the underlying etiology of dysmenorrhea, amenorrhea, and anovulatory bleeding. 2. Explain the physiological changes associated with dysmenorrhea, amenorrhea, and anovulatory bleeding. 3. Identify the signs and symptoms associated with dysmenorrhea,	Menstruation related disorders	Lectures and seminars	Daily, midterm and final exams, reports and seminars

Fifth Year- Course Description 2026-2027

		amenorrhoea, and anovulatory bleeding. 4. Determine the desired therapeutic outcomes for patients with dysmenorrhoea, amenorrhoea, and anovulatory bleeding. 5. Recommend appropriate nonpharmacologic and pharmacologic interventions for dysmenorrhoea, amenorrhoea, and anovulatory bleeding. 6. Design a monitoring plan to assess the safety and effectiveness of pharmacotherapy.			
11	2	1. Describe the pathophysiology of cancer. 2. Define the tumor, nodes, metastases (TNM) system of cancer staging. 3. Define prevention	Cancer chemotherapy and treatment	Lectures and seminars	Daily, midterm and final exams, reports and seminars

Fifth Year- Course Description 2026-2027

		and treatment strategies for cancer. 4. Outline actions for all healthcare professionals to prevent medication errors with cancer treatments.			
12	2	1. Explain the pathophysiology of certain types of leukemia. 2. Explain the signs/symptoms and laboratory disorders associated with leukemias. 3. Identify underlying considerations that would determine the most appropriate chemotherapeutic regimens for patients having leukemia. 4. Describe the available treatment options of certain types of leukemias 5. Recognize the treatment complications	Leukemias	Lectures and seminars	Daily, midterm and final exams, reports and seminars

Fifth Year- Course Description 2026-2027

		associated with the therapy of leukemias.			
13	1	1. Explain the risk factors associated with developing breast cancer. 2. Recognize signs and symptoms related to early and late stages of the disease. 3. Distinguish between good and poor prognostic factors. 4. Determine treatment goals for early-stage, locally advanced, and metastatic breast cancers. 5. Explain the available treatment options for breast cancer. 6. Describe the relevance of hormone, HER2, and PD- 1 receptors. 7. Discuss the benefits and risks associated	Breast cancer	Lectures and seminars	Daily, midterm and final exams, reports and seminars

Fifth Year- Course Description 2026-2027

		with various therapies.			
14	1	1. Identify risk factors associated with prostate cancer development. 2. Appraise the prognostic- and patient-specific data needed to determine appropriate treatment options. 3. Evaluate pharmacotherapeutic treatment options for different types of prostate cancer. 4. Recognize common adverse effects and formulate a monitoring plan for patients receiving androgen deprivation therapy for prostate cancer based on patient-specific factors and the prescribed regimen. 5. Recognize the	Prostate cancer	Lectures and seminars	Daily, midterm and final exams, reports and seminars

Fifth Year- Course Description 2026-2027

		common adverse effects and formulate a monitoring plan for patients receiving treatment for metastatic prostate cancer. 6. Provide recommendations for bone health for patients undergoing treatment for prostate cancer.			
15	1	1. Introduction about common and problematic adverse effects of chemotherapy 2. Recognizing the clinically significant adverse effects 3. Explaining the preventive measures of certain adverse effects 4. Discussing the available therapeutic options of some adverse effects.	Adverse effects of chemotherapy	Lectures and seminars	Daily, midterm and final exams, reports and seminars
16	2	1. Explain the pathophysi	Bipolar disorders	Lectures and seminars	Daily, midterm and final exams,

Fifth Year- Course Description 2026-2027

		ologic mechanisms underlying bipolar disorder. 2. Recognize the symptoms of a manic episode in patients with bipolar disorder. 3. Identify common psychiatric comorbidities of bipolar disorder. 4. List the desired therapeutic outcomes for patients with bipolar disorder. 5. Identify the optimal use of medications as first-line therapy in bipolar disorder, including appropriate dosing. 6. Recommend drug therapy for acute treatment of mania and depressive episodes. 7. Recommend baseline and routine monitoring			reports and seminars
--	--	---	--	--	-----------------------------

Fifth Year- Course Description 2026-2027

		for assessment of adverse effects of medications used in the treatment of bipolar disorder. 8. Identify general treatment differences for agents used to treat bipolar disorder in the pediatric population			
17	1	1. Identify the risk factors for colorectal cancer. 2. Outline preventive and screening strategies for individuals at average and high risk for colorectal cancer. 3. Recognize the signs and symptoms of colorectal cancer. 4. Describe the treatment options for colorectal cancer based on patient-specific factors,	Colorectal cancer	Lectures and seminars	Daily, midterm and final exams, reports and seminars

Fifth Year- Course Description 2026-2027

		such as stage of disease, age of patient, genetic mutations, and previous treatment received. 5. Outline the pharmacological principles for agents used to treat colorectal cancer. 6. Develop a monitoring plan to assess the efficacy and toxicity of agents used in colorectal cancer. 7. Educate patients about the adverse effects of chemotherapy that require specific patient counseling.			
18	2	1. Explain the routes of transmission for human immunodeficiency virus (HIV) and its natural disease progression. 2. Identify typical and	Human immunodeficiency virus	Lectures and seminars	Daily, midterm and final exams, reports and seminars

Fifth Year- Course Description 2026-2027

		atypical signs and symptoms of acute and chronic HIV infection. 3. Identify the desired therapeutic outcomes for patients living with HIV. 4. Recommend appropriate first-line pharmacotherapy interventions for patients with HIV infection. 5. Describe the components of a monitoring plan to assess effectiveness and adverse effects of pharmacotherapy for HIV infection. 6. Educate patients about the state of the disease, appropriate lifestyle modifications, and drug therapy required for effective treatment.			
	2	1. Discuss	Lymphoma and	Lectures and	Daily, midterm

Fifth Year- Course Description 2026-2027

		the underlying pathophysiologic mechanisms of the lymphomas and how they relate to presenting symptoms of the disease. 2. Differentiate the pathologic findings of Hodgkin lymphoma (HL), follicular indolent non-Hodgkin lymphoma (NHL), and diffuse aggressive NHL and how this information yields a specific diagnosis. 3. Describe the general staging criteria for the lymphomas and how it relates to prognosis; evaluate the role of the prognostic systems such as the International Prognostic Score for HL, the Follicular Lymphoma	multiple myeloma	seminars	and final exams, reports and seminars
--	--	--	------------------	----------	---------------------------------------

Fifth Year- Course Description 2026-2027

		International Prognostic Index (IPI), and the IPI for diffuse, aggressive NHL. 4. Compare and contrast the treatment algorithms for early and advanced stage disease for HL. 5. Assess the role of autologous hematopoietic stem-cell transplantation for relapsed lymphomas . 6. Delineate the clinical course of follicular indolent and diffuse aggressive NHL and the implications for disease classification schemes and treatment goals. 7. Outline the general treatment approach to follicular indolent and diffuse aggressive			
--	--	---	--	--	--

Fifth Year- Course Description 2026-2027

		NHL for localized and advanced disease. 8. Interpret the current role for monoclonal antibody therapy in NHL			
20	1	1. Explain the pathophysiology of Endometriosis. 2. Explain the signs/symptoms of Endometriosis. 3. Outline the general treatment approach	Endometriosis	Lectures and seminars	Daily, midterm and final exams, reports and seminars
11. Course Evaluation					
Midterm exam 25 marks, Quizzes and attendance 5 marks, Final exam 70 marks					
12. Learning and Teaching Resources					
Required textbooks (curricular books, if a		Pharmacotherapy Handbook			
		1- ACCP Updates in Therapeutics 2- Applied therapeutics			
Recommended books and references (scientific journals, reports...)		Review articles			
Electronic References, Websites		Medscape			

Fifth Year- Course Description 2026-2027

1. Course Name:					
Therapeutic drug monitoring					
2. Course Code:					
557 PhTdm					
3. Semester / Year:					
Second semester/ Fifth Year					
4. Description Preparation Date:					
9-2026					
5. Available Attendance Forms:					
On campus					
6. Number of Credit Hours (Total) / Number of Units (Total)					
2 hours theory + 2 hours practical (60 hours) / 3 units					
7. Course administrator's name (mention all, if more than one name)					
Theory: Name: Assistant Lecturer Hussein Ali Email: husseinali@bcms.edu.iq Practical: Name: Assistant Lecturer Rana Kadum Email: ranakadum@bcms.edu.iq					
8. Course Objectives					
Course Objectives		At the end of this unit, the student should be able to: recognize characteristics of drugs that make them good candidates for TDM, describe appropriate indications for TDM, understand the factors that may affect the measured concentrations list, and discuss the importance of information needed when requesting drug concentration interpret measured drug concentrations adjust dose based on TDM....			
9. Teaching and Learning Strategies					
Strategy		Lectures Seminar Simple quizzes Brainstorming questions			
10. Course Structure					
Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
1-2	4	1. Discuss the goal of therapeutic drug monitoring. 2. Discuss the need for therapeutic drugs. 3. Identify the four principle biological events associated with pharmacokinetics. 4. Identif	Chapter one: (Clinical Pharmacokinetic and Pharmacodynamic Concepts)	Lectures and practical laboratories	Daily, midterm and final exams, practical exam, reports

Fifth Year- Course Description 2026-2027

		route(s) that drugs can be eliminated. 5. Define the following: a.TDM b.linear and nonlinear pharmacokinetics c. Pharmacokinetic parameters d.Half-life e.volume of distribution f. clearance			
3-4	4	1. Discuss the applied equations that are used to measure the drug concentration 2. Discuss the applied equations that are used to measure the individualized pharmacokinetic parameters 3. Discuss the equations that are used to measure the dose and loading dose	Chapter two: Clinical Pharmacokinetic Equations and Calculations	Lectures and practical laboratories	Daily, midterm and final exams, practical exam, reports

Fifth Year- Course Description 2026-2027

	4	1. Discuss the effect of kidney, liver disease, and heart disease on the drug's pharmacokinetics. 2. Discuss the effect of obesity on the pharmacokinetics of the drug	Chapter Three: Drug dosing in special population	Lectures and practical laboratories	Daily, midterm and final exams, practical exam, reports
5-6	4	1. Identify why we need to monitor drug concentration for aminoglycoside 2. Determine the applied pharmacokinetics methods and equations to calculate the initial dose 3. Determine the applied pharmacokinetics methods and equations to calculate the individualized dose	Chapter four: Aminoglycoside	Lectures and practical laboratories	Daily, midterm and final exams, practical exam, reports
7-8	4	1. Identify why we need to monitor drug concentration for vancomycin	Chapter five: vancomycin	Lectures and practical laboratories	Daily, midterm and final exams, practical exam, reports

Fifth Year- Course Description 2026-2027

		- Determine the applied pharmacokinetics methods and equations to calculate the initial dose - Determine the applied pharmacokinetics methods and equations to calculate the individualized dose			
9-10	3	- Identify why we need to monitor drug concentration for digoxin - Determine the applied pharmacokinetics methods and equations to calculate the initial dose - Determine the applied pharmacokinetics methods and equations to calculate the individualized dose	Chapter six: Digoxin	Lectures and practical laboratories	Daily, midterm and final exams, practical exam, reports
11-12	3	Identify why we need to	Chapter seven: phenytoin	Lectures and practical laboratories	Daily, midterm and final exams, practical exam,

Fifth Year- Course Description 2026-2027

		monitor drug concentrati on for phenytoin 2. Determine the applied pharmacok inetics methods and equations to calculate the initial dose 3. Determine the applied pharmacok inetics methods and equations to calculate the individualiz ed dose			reports
--	--	--	--	--	--------------------

Fifth Year- Course Description 2026-2027

13-14	3	1. Identify why we need to monitor drug concentration for valproic acid 2. Determine the applied pharmacokinetics methods and equations to calculate the initial dose 3. Determine the applied pharmacokinetics methods and equations to calculate the individualized dose	Chapter eight: valproic acid	Lectures and practical laboratories	Daily, midterm and final exams, practical exam, reports
11. Course Evaluation					
20 midterm exam + 20 Laboratory + 60 Final exam					
12. Learning and Teaching Resources					
Required textbooks (curricular books, if any)		Applied Clinical Pharmacokinetics by Larry			
Main references (sources)		Applied Clinical Pharmacokinetics by Larry			
Recommended books and references (scientific journals, reports...)		Applied therapeutics			
Electronic References, Websites		Review articles			

Fifth Year- Course Description 2026-2027

1. Course Name:					
Advanced Pharmaceutical Analysis					
2. Course Code					
558 ChPApa					
3. Semester / Year:					
Second Semester / Fifth Stage					
4. Description Preparation Date:					
9-2026					
5. Available Attendance Forms					
On campus					
6. Number of Credit Hours (Total) / Number of Units (Total)					
3 hours theory +2 hours practical (75)/ 4 units					
7. Course administrator's name (if more than one name)					
Theory Name: Lecturer Dr. Imad Muneeb Email: imad.muneeb@bcms.edu.iq Practical: Name: Assistant Lecturer Hasan Fadhil Email: hasan.fadhil@bcms.edu.iq					
8. Course Objectives					
Co ur se Ob jec tiv es	• Learn about the principles of spectrum • Identify the different spectrum types (UV-FIS), IR, NMR, and Mass. • Uses of the spectrum in identifying organic compounds and medicines. • Enable the student to gain the necessary skills and knowledge to use different spectrometers in order to benefit from them after graduation in drug control laboratories and pharmaceutical factories. • Gain the skills and knowledge necessary to operate advanced devices and interpret the results to prepare qualified pharmacists capable of conducting scientific research. • Training in practical methods for different spectrometry				
9. Teaching and Learning Strategies					
Strategy	1- Theoretical lectures covering all aspects of each method 2- Conducting reports and research on the applications of the mentioned methods on chemical compounds and pharmaceutical preparations 3- Display applied videos to help understand the material and gain skill 4- Use of methodological and supporting books 5- Holding scientific sessions in the form of discussions or seminars				
10. Course Structure					
Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
1	3+2	UV / visible spectroscopy	Introduction & demonstration to visible spectrophotometry	Lectures and practical laboratories	Daily, midterm and final exams, practical exam, reports

Fifth Year- Course Description 2026-2027

2	3+2	UV / visible spectroscopy	Determination of KMnO4/ Beers law	Lectures and practical laboratories	Daily, midterm and final exams, practical exam, reports
3	3+2	UV / visible spectroscopy	Unknown of KMnO4 + Quiz	Lectures and practical laboratories	Daily, midterm and final exams, practical exam, reports
4	3+2	Mass Spectrometry	Colorimetric assay of tetracycline using FeCl3	Lectures and practical laboratories	Daily, midterm and final exams, practical exam, reports
5	3+2	Mass Spectrometry	Unknown of tetracycline using FeCl3method + Quiz	Lectures and practical laboratories	Daily, midterm and final exams, practical exam, reports
6	3+2	Infrared Spectrometry	Determination of tetracycline in acidic medium	Lectures and practical laboratories	Daily, midterm and final exams, practical exam, reports
7	3+2	Infrared Spectrometry	Determination of tetracycline in basic medium	Lectures and practical laboratories	Daily, midterm and final exams, practical exam, reports
8	Midterm Exam				
9	3+2	Infrared Spectrometry	Colorimetric assay of streptomycin by maltol method	Lectures & Labs	Paper exams
10	3+2	Infrared Spectrometry	Colorimetric assay of streptomycin by maltol method	Lectures & Labs	Paper exams
11	3+2	Proton NMR Spectrometry	Unknown of streptomycin by maltol method + Quiz	Lectures & Labs	Paper exams
12	3+2	Proton NMR Spectrometry	IR chart tutorial	Lectures & Labs	Paper exams
13	3+2	C13 NMR Spectrometry	IR chart tutorial	Lectures & Labs	Paper exams
14	3+2	C13 NMR Spectrometry	IR chart tutorial	Lectures & Labs	Paper exams
15	Review				
11. Course Evaluation					
Mid-term written exams 17%					
Daily preparation and daily and oral exams 3%					
Practical side 20 marks					
Final Exam 60 Marks					

Fifth Year- Course Description 2026-2027

12. Learning and Teaching Resources	
Spectrometric Identification of Organic Compounds by Silverstein, Bassler and Morrill. Applications of absorption spectroscopy of organic compounds by Dyer JR.	Required textbooks (curricular books, if any)
like mention above	Main references (sources)
Organic Chemistry by McMurry; 5thed; Thomason learning CA, USA 2000	Recommended books and references (scientific journals, reports...)
Google scholar, ResearchGate	Web sites

Fifth Year- Course Description 2026-2027

1. Course Name:					
Clinical Laboratory Training					
2. Course Code:					
559 ACICI					
3. Semester / Year:					
2 nd semester/5 th year					
4. Description Preparation Date:					
9-2026					
5. Available Attendance Forms:					
Sheets signed by students (training in hospital)					
6. Number of Credit Hours (Total) / Number of Units (Total)					
4 hours Practical (60) / 2 Units					
7. Course administrator's name					
Name: Kawther Faris					
Email: kawther.kf@gmail.com					
Name: Lecturer Dr. Nawfel Ayad					
Email: nawfel.ayad@bcms.edu.iq					
Name: Assistant Lecturer Ibrahim Qais Ismail					
Email: ibraheem.kais0@bcms.edu.iq					
8. Course Objectives					
Course Objectives	Learning students about various Tests applied in hospital labs (Biochemical, Hematological, Bacteriological, Virological, General urine exam, general stool exam). Show them the normal values of each studied parameter and teach them how to explain abnormalities in association with clinical symptoms and diseases.				
9. Teaching and Learning Strategies					
Strategy	Explain work principles+ Applying the lab examinations + making weekly reports + written and practical quiz+ Visiting specific laboratories in general hospitals to take a look on status situation in lab work field.				
10. Course Structure					
Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
1	4	Importance of laboratory tests, how to make sampling	Diagnostic test basis, collecting and transporting specimen.	Lectures and practical laboratories	Daily, midterm and final exams, practical exam, reports
2	4	Glucose situation in the body	Biochemical test: fasting blood glucose, Post prandial glucose, oral glucose tolerance test.	Lectures and practical laboratories	Daily, midterm and final exams, practical exam, reports
3	4	Kidney function	Blood urea, blood creatinine, creatinine clearance, uric acid.	Lectures and practical laboratories	Daily, midterm and final exams, practical exam, reports
4	4	Blood lipids situation	Cholesterol, lipoprotein, triglycerides.	Lectures and practical laboratories	Daily, midterm and final exams, practical exam, reports

Fifth Year- Course Description 2026-2027

5	4	Liver function	Blood proteins, bilirubin.	Lectures and practical laboratories	Daily, midterm and final exams, practical exam, reports
6	4	Testing blood minerals	Calcium, inorganic phosphate, serum chloride.	Lectures and practical laboratories	Daily, midterm and final exams, practical exam, reports
7	4	Analysis of protein metabolism	Alkaline phosphatase, acid phosphatase, alanine aminotransferase, aspartate amino transferase, lactate dehydrogenase, creatinine phosphokinase.	Lectures and practical laboratories	Daily, midterm and final exams, practical exam, reports
8	4	Virology test	Serological tests: VDRL, ASO-titer, hepatitis test.	Lectures and practical laboratories	Daily, midterm and final exams, practical exam, reports
9	4	Serological tests for infections	C-reactive protein test, Rheumatic factor test, Ros Bengal test, typhoid fever test (Widal test), Pregnancy test, TORCH test.	Lectures and practical laboratories	Daily, midterm and final exams, practical exam, reports
10	4	Urinalysis	General urine exam, urine specimen collection.	Lectures and practical laboratories	Daily, midterm and final exams, practical exam, reports
11	4	Stool analysis	General stool exam, stool specimen collection	Lectures and practical laboratories	Daily, midterm and final exams, practical exam, reports
12	4	Blood analysis	Hematological tests: RBC count, Hb, PCV, RBC indices, WBC count, Platelet count.	Lectures and practical laboratories	Daily, midterm and final exams, practical exam, reports
13	4	Blood analysis	Blood typing, COMB test, Bleeding time, ESR.	Lectures and practical laboratories	Daily, midterm and final exams, practical exam, reports
14	4	Bacteriological and sensitivity test	Microbiological tests: culture and sensitivity test, staining methods, enriched media. VITEK II system	Lectures and practical laboratories	Daily, midterm and final exams, practical exam, reports

Fifth Year- Course Description 2026-2027

15	4	Applications of Clinical Microbiology	Identifying the most prevalent lab techniques that can be used in diagnostic microbiology and correlate that with the most clinical prevalent infections	Lectures and practical laboratories	Daily, midterm and final exams, practical exam, reports
----	---	---------------------------------------	--	-------------------------------------	---

11. Course Evaluation

- 40 Marks Quest Practical: (10% Class activity and reports + 5% Oral exam. + 15% practical exam %10+written exam)
 - 60 Marks final exam
-
- 100 Marks total

12. Learning and Teaching Resources

Required textbooks (curricular books, if any)	Oxford handbook of Clinical and Laboratory investigation. By: Drew Provan, 4 th ed. 2018
Main references (sources)	Manual for laboratory training adopted by the department
Recommended books and references (scientific journals, reports...)	Laboratory tests in general practice. K reports 59 C. By: Gillet Pierr, et al 2007
Web sites	https://labtestsonline.org.uk

Fifth Year- Course Description 2026-2027

1. Course Name:					
Drug Delivery Systems Design					
2. Course Code:					
560 ACIDds					
3. Semester / Year:					
Second semester/ Fifth Year					
4. Description Preparation Date:					
9-2026					
5. Available Attendance Forms:					
Students' signature on attendance sheet					
6. Number of Credit Hours (Total) / Number of Units (Total)					
2 hours Theoretical (30 hours) / 2 units					
7. Course administrator's name					
Name: Lecturer Dr. Mohammed Jassim					
Email: mohammed-jassim-neamah@bcms.edu.iq					
8. Course Objectives					
Course Objectives		1. By the end of this course, students will be able to: 2. Explain the process of new drug development, including drug discovery, preclinical evaluation, early formulation studies, and regulatory submission of INDs, NDAs, and ICH guidelines. 3. Explore the principles and applications of pharmaceutical nanotechnology, including the design and use of liposomes, dendrimers, micelles, solid nanoparticles, and lipid-based delivery systems in modern therapeutics. 4. Describe the anatomical and physiological considerations for non-oral routes of drug delivery, including nasal, ocular, transdermal, and pulmonary routes. 5. Analyze formulation challenges and strategies for improving drug solubility, permeability, bioavailability, and patient adherence across various advanced delivery systems. 6. Evaluate the design, function, and clinical considerations of innovative delivery platforms such as patches, inhalers, eye drops, and nanoparticle-based systems.			
9. Teaching and Learning Strategies					
Strategy		Lecturing Homework Quiz			
10. Course Structure					
Week	hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
1-3	6	Introduction, Drug discovery and drug design, Biologic characterization, Early formulation studies, The investigational new drug application, The	New Drug Development and Approval Process Chapter 2 (Pharmaceutical Dosage Forms and Drug Delivery Systems by Howard A. Ansel;	Lectures and seminars	Daily, midterm and final exams, reports and seminars

Fifth Year- Course Description 2026-2027

		new drug application, supplemental, abbreviated, and other applications, international conference on Harmonization of technical Requirements for registration of pharmaceuticals for Human use.	11th edition, 2017)		
4-7	7	Introduction, Applications of pharmaceutical nanotechnology, Polymer-drug conjugates, Dendrimers, Micelle systems, Solid nanoparticles, Liposomes, bilayer vesicles and lipid nanoparticles, Microcapsules and microspheres, Ongoing developments.	Pharmaceutical Nanotechnology and Nanomedicines Chapter 46 (Aulton's Pharmaceutics; The Design and Manufacture of Medicines; 6th edition, 2022)		
8-9	4	Introduction, Anatomy and physiology, Drug delivery, Nasal delivery systems	Nasal Drug Delivery Chapter 40 (Aulton's Pharmaceutics; The Design and Manufacture of Medicines; 6th edition, 2022)	Lectures and seminars	Daily, midterm and final exams, reports and seminars
10-11	4	Introduction, Anatomy and physiology of the eye, Some common ocular conditions and pharmacological interventions, Topical ophthalmic preparations, formulating ophthalmic preparations, Topical, liquid ophthalmic preparations, Barriers to topical	Ocular Drug Delivery Chapter 41(Aulton's Pharmaceutics; The Design and Manufacture of Medicines; 6th edition, 2022)	Lectures and seminars	Daily, midterm and final exams, reports and seminars

Fifth Year- Course Description 2026-2027

		ocular drug absorption, Increasing drug solubility and absorption in topical ophthalmic preparations, Sterility of ophthalmic preparations, Ocular drug pharmacokinetics. Targeting the posterior segment of the eye. Problems with traditional and new ocular drug delivery systems, Patient adherence and instillation of eye drops.			
12-13	4	Introduction, Factors affecting percutaneous absorption, Percutaneous absorption enhancers, Percutaneous absorption models, Design features of transdermal drug delivery systems, Advantages and disadvantages of TDDSs, Examples of transdermal drug delivery systems, General clinical considerations in the use of transdermal and TDDSs, Patches (not systems), Tapes, Examples of transdermal preparations.	Transdermals and Transdermal Drug Delivery Systems Chapter 11 (Pharmaceutical Dosage Forms and Drug Delivery Systems by Howard A. Ansel; 11th edition, 2017)	Lectures and seminars	Daily, midterm and final exams, reports and seminars

Fifth Year- Course Description 2026-2027

14-15	4	Inhaled drug delivery, Formulating and delivering therapeutic inhalation aerosols, Methods of aerosol size analysis.	Pulmonary Drug Delivery Chapter 39 (Aulton's Pharmaceutics; The Design and Manufacture of Medicines; 6th edition, 2022)	Lectures and seminars	Daily, midterm and final exams, reports and seminars
11. Course Evaluation					
30 Marks Theoretical assessment. (paper-based mid-term exam + quiz + attendance + seminar) 70 Marks paper-based theoretical final exam Total 100 Marks					
12. Learning and Teaching Resources					
Required textbooks (curricular books, if any)		1) Aulton's Pharmaceutics; The Design and Manufacture of Medicines; 6th edition, 2022. 2) Pharmaceutical Dosage forms and Drug Delivery Systems by Howard A. Ansel; 11th edition, 2017.			
Main references (sources)					
Recommended books and references (scientific journals, reports...)					
Electronic References, Websites					

Fifth Year- Course Description 2026-2027

1. Course Name:					
Pharmaceutical Biotechnology (Theoretical)					
2. Course Code:					
561 PhPb					
3. Semester / Year:					
2 nd Semester/5 th year					
4. Description Preparation Date:					
9-2026					
5. Available Attendance Forms:					
Students' signature on attendance sheet					
6. Number of Credit Hours (Total) / Number of Units (Total)					
1 hour Theoretical (15 hours) / 1 unit					
7. Course administrator's name					
Theory Name: Assistant Lecturer Rana Kadum Email: ranakadum@bcms.edu.iq					
8. Course Objectives					
Course Objectives Identify the most common therapeutic peptides and proteins derived from biotechnological sources Knowing structure details, formulation requirements, and pharmacist role.					
9. Teaching and Learning Strategies					
Strategy	Lecturing Homework Quiz				
10. Course Structure					
Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
1	1	Importance and Definition of Biotechnology History of Biotechnology derived product	Biotechnology - introduction	Lectures and seminars	Daily, midterm and final exams, reports and seminars
2	1	Recombinant DNA biotechnology.	Formulation biotechnology prod (biopharmaceutica I consideration)	Lectures and seminars	Daily, midterm and final exams, reports and seminars
3	1	Sterilization (chemical + physical Methods). Chemotherapy.	Microbial consideration-sterile pyrogen v decontamination	Lectures and seminars	Daily, midterm and final exams, reports and seminars
4	1	Types and specifications of excipients used in biotechnological formulation	Excipients of parenteral products -soluble enhancer anti-adsorption age buffer component preservatives - osmotic agents.	Lectures and seminars	Daily, midterm and final exams, reports and seminars

Fifth Year- Course Description 2026-2027

5	1	Types and specifications of excipients used in biotechnological formulation	Excipients of parenteral products soluble enhancer anti-adsorption age buffer component preservatives – osmotic agents.	Lectures and seminars	Daily, midterm and final exams, reports and seminars
6	1	Formulation requirements according to route of administration	Route of administration Parenteral route Oral route.	Lectures and seminars	Daily, midterm and final exams, reports and seminars
7	Mid-term exam				
8	1	Formulation requirements according to route of administration	Route of administration Parenteral route Oral route	Theoretical lectures	Paper-based exams
9	1	Formulation requirements according to route of administration	Route of administration Parenteral route Oral route	Theoretical lectures.	Paper-based exams
10	1	Formulation requirements according to route of administration	Route of administration Alternative routes (nasal-pulmonary rectal-buccal transdermal	Theoretical lectures.	Paper-based exams
11	1	Formulation requirements according to route of administration	Route of administration Alternative routes (nasal-pulmonary rectal-buccal transdermal	Theoretical lectures.	Paper-based exams
12	1	ADME of peptides and proteins Assessments and relationships to pharmacodynamic s action	Pharmacokinetic of peptides and protein (Elimination of proteins (proteolysis excretion-metabolism	Theoretical lectures.	Paper-based exams
13	1	ADME of peptides and proteins Assessments and relationships to pharmacodynamic s action	Pharmacokinetic of peptides and protein (Elimination of proteins (proteolysis excretion-metabolism	Theoretical lectures.	Paper-based exams

Fifth Year- Course Description 2026-2027

14	1	ADME of peptides and proteins Assessments and relationships to Pharmacodynamic s action	Pharmacokinetic of peptides and protein (Elimination of proteins (proteolysis excretion- metabolism	Theoretical lectures.	Paper-based exams
15	Question and answers (Corse review)				
11. Course Evaluation					
• 30 MarksTheoretical assessments; (paper-based mid-term exam) • 70 Markspaper-based theoretical final exam					
100 Marks total					
12. Learning and Teaching Resources					
Required textbooks		1. pharmaceutical biotechnology Crommelin, Robert D. Syinder			
Main references (sources)		1. pharmaceutical biotechnology Crommelin, Robert D. Syinder			
Recommended books and references (scientific journals, reports...)					
Electronic References, Websites
